

Jake Borah

Jake Borah has taught HLA classes or given HLA tutorials throughout the world from Asia to Europe for the last six years. He is a retired military officer with over 30 years experience in training and simulation. Jake is currently a Senior Systems Engineer in the Orlando Office of the AEGIS Technology Group. He is normally assigned as Project Manager or Technical Lead on projects that require a high degree of modeling and simulation expertise and a capability to integrate leading edge technology into ongoing processes. Jake has frequently supported US and Canadian government sponsored HLA related projects because of his mastery of the HLA technology, and expertise in federation development.

Jake is a Certified Modeling and Simulation Professional (CMSP). He is a recognized expert and a prominent member of the worldwide M&S community as reflected by his work within the Simulation Interoperability and Standards Organization (SISO) and the International Society for Computer Simulation (SCS). For four years he served as the chair for the Military Modeling and Simulation Track of the SCS Summer Conference. Now Jake serves as the chair of the SISO Simulation Interoperability Workshop Distributed Simulation Support Processes and Tools forum in addition to being the chair of the SISO Simulation Conceptual Modeling Study Group. He has also been invited to participate on several drafting groups that have produced HLA related IEEE standards or recommended practices guides. Finally, when he has had time to spare, he has been an adjunct instructor teaching discrete event simulation to graduate level students at the University of Central Florida.
